

EP-IR GAS HPA

“We sell Solutions, not Boxes”

CIC Photonics, Inc. is dedicated to providing today's growing industries with the highest sensitivity and fastest time response instrumentation. Our analyzers are used worldwide in a variety of different arenas, and although CIC Photonics has a set of core systems, we pride ourselves on truly meeting the needs of our customers by adapting the core analyzers to their specifications.

Our EP-IR GAS high pressure analyzer incorporates a rugged EP-IR (Encoded Photometric Infrared) spectrometer with a stainless steel high pressure gas cell. This combination produces an analyzer that can handle some of the most demanding applications. The EP-IR GAS high pressure analyzer is ideal for applications for which gas species main adsorption peaks lie in the 2.5 μ m to 5 μ m spectral range. Its sensitivity is component and pressure dependent. For more specific limits of detection, please contact CIC Photonics.

The key features of the EP-IR spectrometer are:

- Simultaneous multiple gas monitoring
- Ultra fast scanning - 100 scans/sec
- Vibration insensitive
- No hydroscopic materials
- No internal lasers
- Real-time data
- Embedded PC and flash memory
- 128 photometric channels

For more information on the EP-IR technology please contact us.

Applications

- Hydrocarbons
- Process Streams
- Moisture Analysis
- Research Studies
- Corrosive and Toxic Process Gas

CIC Photonics, Inc

9000 Washington St. NE
Albuquerque, NM USA 87113

Corporate Headquarters: (505) 343-9500
Technical Support: (505) 343-1489
Fax: (509) 479-2980

IRGAS EP-IR Short Path Gas Analyzer

System Specifications

System Components

EP-IR Spectrometer with an electronically cooled PbSe detector
CRV High Pressure Gas Cell

Sensitivity Range

Component and pressure dependent, please contact us

Pressure Range

150 to 3000 psi

Temperature Range

0°C to 300°C

Analyzer Options

- Digital Analog Output
- Valving Manifold
- Automated Manifold
- Computer
- Script Editor Software (runs automated manifold)
- Moisture Reduction Stack
- Cabinet/Rack Mount
- Additional Analyzers (O₂, H₂, THC, etc.)
- Multipoint Monitoring
- Heated/Unheated Sampling Systems

CIC Photonics
